Alexander Pawlowitsch CHIZHEVSKY
President
Union of Architects of Ukraine

Berlin/ München, 25.02.2022

Dear President,
Dear Colleague Chizhevsky,

With the utmost outrage we are following the inhuman attack on Ukraine and its citizens by Russian troops. As architects, we are always seeking to create a safe, livable and sustainable world and thus the destruction of lives, homes, towns and cities is also a direct attack against all our values.

In addition to our whole hearted support and compassion we would like to offer concrete help in particular to the members of the Union of Architects of Ukraine, our colleagues and their families. We are currently setting up a network of colleagues in Germany, offering safe places in their homes for Ukrainian families that made it to Germany. We also would like support Ukrainian universities and the architecture faculties by offering online teaching support, if needed.

Please let us know, what other measures might be helpful for the Union of the Architects of Ukraine, its members and their families to alleviate them in this horrible situation.

In spirit and hopefully also in action we are stand firmly by your side.

Kindest regards

Andrea Gebhard
President
